sQuid is the latest innovation in cashless ePayment solutions

sQuid is an electronic payments service, designed to meet the needs of schools and universities. sQuid lets you replace the handling and management of cash and cheques on campus, and provides you with end-to-end controls.

Our systems are unique in the education sector, benefiting from a multi-million pound investment in transaction technologies. sQuid is authorised and regulated by the Financial Conduct Authority.

This investment enables sQuid to offer the lowest cost and most flexible solution for education payments. We can tailor our platform for your requirements, and we have the widest range of top-up options for parents and account holders, ensuring that everyone can benefit from using sQuid ePayments.

How sQuid works

sQuid ePayments is the alternative to the debit and credit card networks for small value payments.

Through our own technologies, sQuid gives users a multi-purpose smart account, accessible by contactless smartcard, biometric payments on campus, or for online payments.

In education, sQuid brings the power of modern IP systems to deliver efficient payments, settlement and integration with the school/university back office, combined with a great user experience.

We work with major equipment and catering service suppliers to deliver our fast, flexible and secure payments solution to the point of purchase. Partners include EPOS system, smart card and biometric suppliers, catering service operators, accounts software providers, as well as local councils and transit operators.

sQuid at a glance

- Electronic payment service
- Online school payments for parents
- Enables cashless catering
- Enables other on-campus transactions
